Career Objective

A MERN Stack Developer interested in building modern and scalable web applications. I aim to solve real-world problems and become an effective part of a growth-oriented team.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Tools & Technologies: Git, GitHub, Firebase, JWT, REST API, VS Code

Projects

1. Food Expired Tracker

- Implemented secure user authentication (Firebase/JWT) and a personalized dashboard to manage food inventory with automated expiry alerts.
- Developed a community food-sharing platform allowing users to list and request surplus items to reduce waste.
- **Tech Stack:** React.js | Node.js | Express.js | MongoDB | Firebase | Tailwind CSS
- **Live Link:** [Click here](#) | Github Link: [client side](#) | [server side](#)

2. Find Your Roommates

- Developed a secure platform with user authentication where users can create detailed profiles with their lifestyle preferences to find compatible roommates.
- Implemented a dynamic filtering and search system allowing users to browse potential roommates based on location, budget, and habits.
- **Tech Stack:** React.js | Node.js | Express.js | MongoDB | Firebase | Tailwind CSS
- **Live Link:** [Click here](#) | Github Link: [client side](#) | [server side](#)

Education

- Bachelor of Arts (B.A.)
- Cooch Behar College, Coochbehar
- Expected Graduation: 2027

Languages

- **Bengali:** (Native)
- **Hindi:** Conversational

- **English:** (Professional Working Proficiency)
